

FEBRUARY 2016 – etfSA.co.za MONTHLY SOUTH AFRICAN ETF, ETN AND UNIT TRUST PASSIVE INDEX TRACKING **PERFORMANCE SURVEY**

Mike Brown, Managing Director, etfSA.co.za

The Performance Survey for the period ended 29th February 2016, is attached. The Survey measures total investment returns for all 71 JSE listed ETFs/ETNs, and 24 index tracking unit trusts for periods of 3 months to 10 years.

The short-term data, for 6 months or less, shows that resource linked index tracking funds are comfortably outperforming other sectors of the market. The **NewFunds S&P GIVI RESI ETF**, which picks a portfolio of mining shares from the top 20 resource companies in South Africa, using an intrinsic value methodology, has provided incredible performance returns. Gold commodity ETFs have also displayed strong investment performance over the past 6 months.

The Summary table of the top performing index trackers is shown below. The detailed performance table for each tracker fund available to the SA retail investor is appended.

The etfSA Performance Survey measures the total return (Net Asset Value (NAV to NAV)) changes including reinvestment of dividends) for index tracking unit trusts and Exchange Traded Funds (ETFs) available to the retail public in South Africa. The performance tables measure the 1 month to 10 years total return for a lump sum investment compared with the benchmark index returns (including reinvestment of dividends). All indices are shown in total return format. Note, as the FTSE/JSE calculates the index without taking into account any brokerage or other transaction costs, index tracking products will typically slightly underperform the index because of their transaction and other running costs.

Please Note: future investment performance will not necessarily replicate historic performance data. All data used in the Survey is sourced from Profile Media, who obtain daily data from all index tracker product issuers.
