

## OCTOBER 2015 – etfSA.co.za MONTHLY SOUTH AFRICAN ETF, ETN AND UNIT TRUST PASSIVE INDEX TRACKING PERFORMANCE SURVEY

Mike Brown, Managing Director, etfSA.co.za

The Performance Survey for the period ended 30<sup>th</sup> October 2015, is attached. The Survey measures total investment returns for all 70 JSE listed ETFs/ETNs, and 24 index tracking unit trusts for periods of 3 months to 10 years.

Foreign denominated index tracking products, that are readily accessible to the SA public as JSE listed Exchange Traded Products, dominate the performance returns for periods of 6 months to 5 years. The combination of global equity market recovery, coupled with the depreciation of the rand, has made this market sector the optimal source of high investment returns for the entire period. The investment public, particularly institutional and retirement fund investors, have been slow to pick up on the alpha type returns from such investments and have often stuck rigorously to trying to source such returns in the domestic investment market, often with very limited success.

In the short-term (3 months), the best investment returns have come from commodity tracking ETFs and ETNs, notably palladium. Although these are early days, this may be an indication of a commodity price revival.

The etfSA Performance Survey measures the total return (Net Asset Value (NAV to NAV)) changes including reinvestment of dividends) for index tracking unit trusts and Exchange Traded Funds (ETFs) available to the retail public in South Africa. The performance tables measure the 1 month to 10 years total return for a lump sum investment compared with the benchmark index returns (including reinvestment of dividends). All indices are shown in total return format. Note, as the FTSE/JSE calculates the index without taking into account any brokerage or other transaction costs, index tracking products will typically slightly underperform the index because of their transaction and other running costs.

**Please Note:** future investment performance will not necessarily replicate historic performance data. All data used in the Survey is sourced from Profile Media, who obtain daily data from all index tracker product issuers.
