**Annual fee** – this is a service charge (% based) applicable to each class of a fund, that is levied on the value of your portfolio and includes the fund management fee and administration fee. The fee also includes other charges such as audit, custody and index provider fees that are normally additional permissible deductions. Annual fees are calculated and accrued daily and recovered monthly from the income awaiting distribution in the fund.

This portfolio is an exchange traded fund (ETF). The charges detailed above relate to the portfolio, they do not include the fees for trading on an exchange. <b>Based on period from:</b>	14/03/2018
<b>Total Expense</b>	0.34%
<b>Transaction Costs</b>	0.10%
<b>Total Investment Charge</b>	0.44%
<b>1 Year Total Expense</b>	0.34%

**Total Expense (TER):** This ratio shows the charges, levies and fees relating to the management of the portfolio and is expressed as a percentage of the average net asset value of the portfolio, calculated over the period shown and annualised to the most recently completed quarter. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER should not be regarded as an indication of future TERs.

**Transaction Costs (TC):** This ratio shows the percentage of the value of the fund incurred as costs relating to the buying and selling of the fund's underlying assets. TC are a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, investment decisions of the investment manager and the TER.

**Total Investment Charges (TIC):** This ratio is simply the sum of the TER and TC, showing the percentage of the value of the fund incurred as costs relating to the investment of the fund. It should be noted that performance figures account for all costs included in the TIC ratio, so you should not deduct the TIC from performance figures, the performance is already net of the TIC.

## Commentary

### Fund review

The fund performed in line with the Feeder Fund and the index over the quarter.

### Market overview

Global markets rallied on the back of fiscal and monetary stimulus. Economic activity improved over the quarter as many economies reopened. To minimise the COVID-19 economic damage to businesses and individuals, central banks and governments globally rolled out monetary and fiscal responses. In Q2 2020, MSCI EM was up +17.3% but behind MSCI EMEA (+17.8%) and MSCI World (+18.8%). The South African Reserve Bank took two drastic measures in supporting the local economy. The first was a 100bp cut in the key policy rate to 4.25% on 14 April 2020. Secondly, we saw a further cut in the key policy rate by 50bp to 3.75% on 21 May 2020. On 24 June 2020 finance minister Tito Mboweni presented the supplementary budget speech. The economic picture painted by the minister was bleak. SA GDP growth is expected to decline by 7.2% YoY in 2020, while growth next year is forecast at 2.1% YoY. Local indices were up over Q2 with Top 40 (+24.2%), All Share (+23.2%) and the Capped SWIX (+21.6%). ALBI (+9.9%), however the STeFI (+1.5%).

### Looking ahead

COVID-19 coverage will continue to dominate the headlines as rising infection rates could lead to further social distancing measures being imposed or voluntarily adopted. Globally asset classes are pricing in the V shaped recovery. We are seeing positive signs of global cooperation as governments are coming together to find a solution to defeat the pandemic. Consensus expectations are currently for the global economy to rebound in 2021 once the health crisis is resolved and indeed for this to begin in the second half of 2020.

## Disclosures

Collective Investment Schemes in Securities (CIS) are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to future performance. CIS are traded at ruling prices and can engage in borrowing and scrip lending.

The 1invest Global REIT Index Feeder ETF is a portfolio of the STANLIB ETF Collective Investment Scheme (the Scheme).

The manager of the Scheme is STANLIB Collective Investments (RF) (Pty) Limited (the Manager). The manager has a right to close a portfolio to new investors in order to manage the portfolio more efficiently in accordance with its mandate. The Manager does not provide any guarantee either with respect to the capital or the return of a CIS portfolio. A schedule of fees and charges and maximum commissions is available on request from the Manager.

The trustee of the Scheme is Absa Bank Limited.

Should the portfolio include any foreign securities these could expose the portfolio to any of the following risks: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information.

This portfolio is an Exchange Traded Fund registered as a CIS (CIS-ETF), it is listed on an exchange and may therefore incur additional costs. Participatory interests in a CIS-ETF cannot be purchased directly from the Manager. A CIS-ETF is subject to exchange listing requirements and settlement cycles for equities and all trading in a CIS-ETF is through an exchange.
