Factsheet - March 2024

The Home of Retirement Funds

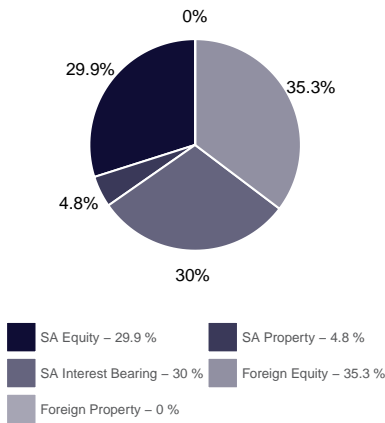

PORTFOLIO DESCRIPTION

The objective of the etfSA RA Wealth Default Portfolio is to offer a static strategic asset allocation into a limited range of vanilla asset class ETFs, with a low tracking error allowance. This default investment portfolio is offered to comply with Section 36 of the Pension Funds Act, No. 24 of 1956, as amended on 25 August 2017, with specific reference to Regulation 37-40. Although the portfolio aims to add an element of protection to invested capital, it does not offer capital or performance guarantees, therefore portfolio value fluctuations may occur in the short term.

INVESTOR PROFILE

The Portfolio is ideal for investors who are self-employed or already contributing to an employer's retirement fund and would like to make additional savings for retirement. The portfolio is suitable for an investor with a medium-to-long-term investment horizon. The portfolio makes no claims to generating alpha from any source, but rather offers a low tracking error and passive allocation to strategic asset classes. The portfolio is well-suited for moderate risk-taking investors desiring market-related returns, whatever those may be.
