

Investment Objective

The mandate of the Satrix Quality South Africa ETF ("Satrix Quality") is to track, as closely as possible, the value of the S&P Quality South Africa Index. Satrix Quality South Africa ETF is an index tracking fund, registered as a Collective Investment Scheme, and is also listed on the Johannesburg Stock Exchange as an Exchange Traded Fund. Satrix Quality South Africa ETF provides investors with the price performance of the S&P Quality South Africa Index as well as pays out, on a quarterly basis, all dividends received from companies comprising the index, net of cost. In order to reduce costs and minimise tracking error, Satrix Quality South Africa ETF may engage in scrip lending activities. Manufactured (taxable) dividends could arise from such transactions.

*The Management Fee is expressed as a percentage of the daily NAV of the CIS and calculated over a period of 1 year on an annualised basis. This Fee is net of any scrip lending income and Management Fee waiver, where applicable.

**The Total Expense Ratio (TER) is the charges incurred by the portfolio, for the payment of services rendered in the administration of the CIS. The TER is expressed as a percentage of the daily NAV of the CIS and calculated over a period of 1 year on an annualised basis.

***The Transaction Cost (TC) is the cost incurred by the portfolio in the buying and selling of underlying assets. This is expressed as a percentage of the daily NAV of the CIS and calculated over a period of 1 year on an annualised basis.

The TER/TC is calculated from 01 January 2019 to 31 December 2019. The current TER/TC cannot be regarded as an indication of future TER and TC. A higher TER and TC does not imply a poor return nor does a low TER and TC imply a good return. Obtain the costs of an investment prior to investing by using the EAC calculator provided at www.satrix.co.za.
