Market Commentary

Global markets experienced a sharp sell-off in February, ending the month at its worst levels, as the combined impact of the spread of the Covid-19 virus, a slump in oil prices, and fears of an accelerated slowdown in economic growth, accentuated the disconnect between recent strong market performance, and deteriorating economic fundamentals. On the local front, the national budget was well received by the market, but was quickly overtaken by negative global factors. The risk of credit rating downgrades has increased, but is largely priced in, as could be seen by the relative performance of bonds (+3%) to equities (-9%). Risk-off sentiment was evident in capital flows into the US, with the dollar strengthening, US bond yields falling to just above 1%, and demand for precious metal commodities. The rand has been the worst performing EM currency YTD, depreciating by 10.6% against the USD. Counterintuitively, despite the risk-off sentiment, the MSCI EM index (-5.3%), supported by the MSCI China index (+1%) outperformed the S&P 500 (-8.4%), highlighting the effectiveness of quick action by the People's Bank of China in response to the Coronavirus.

Tax free accounts offered under Section 12T of the Income Tax Act

In February 2015, the SA Government announced a new tax dispensation whereby SA individuals of all ages can invest up to R33 000 per annum, and a lifetime limit of R500 000, in a special tax incentive account. There is no form of tax payable on these accounts – no capital gains tax, no dividend withholding tax, no interest tax and no securities transfer tax. This allowance has been enabled through Section 12T of the Income Tax Act, 1962 and the investors are advised to familiarise themselves with the regulations applying thereto.

Features of the ETF Tax Free Investment Account (ETFIA)

- ❖ Tax-free accounts using only low cost, transparent and liquid ETFs as components.
- ❖ Low Costs – 1% per annum includes VAT, total administration, portfolio management and advisory fees. All transaction costs, incl. the reinvestment of distributions, are also included in this fee.
- ❖ Modular design allows for contributions from R1000 at any time, up to a maximum of R33 000 per tax year.
- ❖ A selection of four portfolios offered, giving differentiated exposures and risk profiles. You can also invest in individual ETFs for the full R33 000 amount.
- ❖ Tax-free accounts fully compliant with Section 12T of the Income Tax Act.
- ❖ Administrator – Computershare (Pty) Ltd.
- ❖ Portfolio Managers and Financial Advisers – etfSA Portfolio Management Company (Pty) Ltd.

Who should invest in the Balanced Portfolio?

An ETFIA is ideal for investors who want a low cost, transparent investment-linked tax-free account. The Balanced Portfolio is suitable for an investor with an investment horizon of 3-5 years – investors who wish to preserve the value of their near-term tax-free savings and investments. The portfolio is well-suited for more conservative investors. The intention of this portfolio is to provide a low-to-medium risk balanced fund tax-free account. Any capital gains realised in this account will also be tax-free. The portfolio does not pay out interest or dividends – any distributions received from underlying investments are automatically reinvested into the portfolio to allow for additional compounded growth on a tax-free basis.
