Market Commentary

After some decent recovery from the March lows, domestic investment assets paused in August, with most headline indices largely unchanged for the month. Bonds marginally outperformed equities in aggregate, but financials were the biggest disappointment, led lower by banks, life assurance and property shares. Offshore investments continued their outperforming trend, despite a strengthening bias for the rand, as US equities, and tech stocks in particular (e.g. Nasdaq), continued to power ahead. China led the way for emerging markets, although they have yet to catch up to their US counterparts. On the domestic front, economic growth remains on the back foot (the next three months will be critical for the SA recovery, as UIF funding reduces and the extra grant payments come to an end next month), and with inflation expectations still largely under control, it does provide scope for the SARB to cut interest rates one more time at one of the remaining MPC meetings in 2020. The inflation outlook is supported by a lack of demand in the economy, and with the US dollar at two-year lows, it supports a stronger relative picture for the rand against the dollar, as opposed to other currencies.

Tax-free accounts offered under Section 12T of the Income Tax Act

In February 2015, the SA Government announced a new tax dispensation whereby SA individuals of all ages can invest up to R33 000 per annum, and a lifetime limit of R500 000, in a special tax incentive account. There is no form of tax payable on these accounts – no capital gains tax, no dividend withholding tax, no interest tax and no securities transfer tax. This allowance has been enabled through Section 12T of the Income Tax Act, 1962 and the investors are advised to familiarise themselves with the regulations applying thereto.

Features of the ETF Tax Free Investment Account (ETFIA)

- ❖ Tax-free accounts using only low cost, transparent and liquid ETFs as components.
- ❖ Low Costs – 1% per annum includes VAT, total administration, portfolio management and advisory fees. All transaction costs, incl. the reinvestment of distributions, are also included in this fee.
- ❖ Modular design allows for contributions from R1000 at any time, up to a maximum of R33 000 per tax year.
- ❖ A selection of four portfolios offered, giving differentiated exposures and risk profiles. You can also invest in individual ETFs for the full R33 000 amount.
- ❖ Tax-free accounts fully compliant with Section 12T of the Income Tax Act.
- ❖ Administrator – Computershare (Pty) Ltd.
- ❖ Portfolio Managers and Financial Advisers – etfSA Portfolio Management Company (Pty) Ltd.

Who should invest in the Equity Portfolio?

An ETFIA is ideal for investors who want a low cost, transparent investment-linked tax-free account. The Equity Portfolio is suitable for an investor with an investment horizon of at least 10 years and beyond – it is designed to provide maximum growth in capital for tax-free investments.

The portfolio is well-suited for risk-tolerant investors. The intention of this portfolio is to provide a higher risk account that will seek to generate capital gains over time, through total exposure to equities by investing in appropriate ETFs. Any income in the account, which is not the chief objective of this higher risk account, is reinvested in the account on a tax-free basis.

The portfolio does not pay out interest or dividends – any distributions received from underlying investments are automatically reinvested into the portfolio to allow for additional compounded growth on a tax-free basis.
