

1invest Swix 40 ETF

Fund information update at 31 March 2022

What is the fund's objective?

The objective of the 1invest Swix 40 ETF is to track the FTSE/JSE Shareholder Weighted 40 Index (SWIX40) as closely as possible.

What does the fund invest in?

The fund invests in the constituents of the SWIX40 Index and aims to replicate the Index by holding the same weightings of these constituents. The SWIX40 is an equity Index of the 40 largest companies by shareholder weighted net market capitalisation, listed on the JSE. Shareholder weighted indices reduce constituent weights by foreign shareholdings and therefore represent South African investors. The fund is rebalanced quarterly and therefore has minimal trading costs. The fund may also hold a small portion in cash instruments and listed derivatives to effect efficient portfolio management.

What possible risks are associated with this fund?

Risks include general market conditions and market volatility, company specific risk, economic and political risk.

Who should consider investing in this fund?

- Investors who seek exposure to the South African equity market;
- Investors who seek a low cost fund;
- Investors who seek a simple and transparent investment process that invests in liquid, listed securities;
- Investors who seek equity market exposure that blends well with other investment strategies to reduce total costs and diversify risk;
- Investors who are willing to take a longer term view as this fund is aggressively risk profiled and investors should expect some volatility in the shorter term.

Securities Lending Ratio 16.75%

Securities lending can increase returns in a low risk manner. Risks associated with such transactions are borrower default risk. This risk is minimised through all securities lending being fully collateralised and only using reputable counterparties. Exposure of the fund to counterparties is continuously monitored. Manufactured (taxable) dividends could arise from such transactions. The Swix 40 ETF engages in securities lending with Rand Merchant Bank and Standard Bank of South Africa.

What are the costs to invest in this fund?

Maximum charges including VAT

	Class A
Annual fee	0.288%
Performance fee	N/A

Annual fee - this is a service charge (% based) applicable to each class of a fund, that is levied on the value of your portfolio and includes the fund management fee and administration fee. The fee also includes other charges such as audit, custody and index provider fees that are normally additional permissible deductions. Annual fees are calculated and accrued daily and recovered monthly from the income awaiting distribution in the fund.

This portfolio is an exchange traded fund (ETF). The charges detailed above relate to the portfolio, they do not include the fees for trading on an exchange. Brokerage fees, which are payable when buying or selling an ETF on an exchange, are levied by a broker and may vary depending on the broker used.

Cost ratios (annual) including VAT as at 31 December 2021

	Class A
Based on period from:	01/01/2019
Total Expense	0.29%
Transaction Costs	0.00%
Total Investment Charge	0.29%
1 Year Total Expense	0.29%

Total Expense (TER): This ratio shows the charges, levies and fees relating to the management of the portfolio and is expressed as a percentage of the average net asset value of the portfolio, calculated over the period shown and annualised to the most recently completed quarter. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER should not be regarded as an indication of future TERs.

Transaction Costs (TC): This ratio shows the percentage of the value of the fund incurred as costs relating to the buying and selling of the fund's underlying assets. TC are a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, investment decisions of the investment manager and the TER.

Total Investment Charges (TIC): This ratio is simply the sum of the TER and TC, showing the percentage of the value of the fund incurred as costs relating to the investment of the fund. It should be noted that performance figures account for all costs included in the TIC ratio, so you should not deduct the TIC from performance figures, the performance is already net of the TIC.

Commentary

Fund review

The fund performed in-line with the index over the quarter. The last quarterly review of the index saw the deletion of Reinet Investments SCA and addition of Anheuser Busch Inbev SA to the index. The fund benefited from its exposure to Exxaro Resources Limited, Sasol Ord Shs and Nedbank Group Ltd, which were the three top performers, with Exxaro Resources Limited returning 44.91% over the quarter. However, its exposure to Prosus NV, Naspers Limited and Mondi Plc detracted from performance over the quarter, as these were the three worst performers in the fund. Prosus NV returned -39.24% over the quarter.

Market overview

Q1 2022 saw Russia's invasion of Ukraine and the resulting sanctions imposed by various countries on Russia. Consequently, commodity prices surged as supply pressures heightened globally for oil and other commodities of which Russia is a net exporter (e.g., Wheat). The global economy slowed, and US inflation reached a 40-year high of 7.9% as at the end of February. Consequently, the Fed hiked rates for the first time in 3 years which sent a further shock throughout markets worldwide. Global markets felt the pressure and were mainly in the red over the quarter with the MSCI World returning -5.04%, MSCI EM at -6.99%, and the MSCI EMEA at -14.43%. Locally, the president relaxed Covid restrictions even further, giving more momentum to the re-opening of the economy. However, the local market was not spared from feeling the effects of the Russian invasion of Ukraine, with surging commodity prices driving the petrol price to uncharted territory. Local indices saw solid gains even when compared to global peers. The resources and industrials rally drove the markets with the Top 40 returning +3.64%, All Share at +4.07%, Capped SWIX ALSI at +6.72%, ALBI at +1.86%, STEFI at +1.03% and the ZAR strengthening 8.32% relative to the USD.

Looking ahead

2021 was a year of recovery. However, 2022 is expected to be a year of moderation, especially when it comes to economic growth. Globally, restrictive monetary policy has taken effect and both the Fed and the MPC are expected to tighten further over the course of the year. As a result of these interventions, we expect economic growth and risky asset classes (e.g., equities) to be adversely affected. Even though the impact of Covid seems to be diminishing in the local market, coupled with the relaxation of restrictions, a fifth wave is still expected by experts. In various global markets, we have seen a recent resurgence in cases, with China introducing new Covid-related restrictions. Given the looming resurgence of Covid risks, the Tourism industry can be expected to be one of the worst hit industries. Other major risks to consider are broader geopolitical tensions, especially the escalating situation between Russia and Ukraine. Should these countries fail to reach a peace agreement soon, the global energy crisis will be exacerbated, with oil and gas already under significant pressure. Broad supply chain pressures can be expected with accompanying cost push inflation.

Disclosures

Collective Investment Schemes in Securities (CIS) are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to future performance. CIS are traded at ruling prices and can engage in borrowing and scrip lending.

The 1invest Swix 40 ETF is a portfolio of the STANLIB ETF Collective Investment Scheme (the Scheme).

The manager of the Scheme is STANLIB Collective Investments (RF) (Pty) Limited (the Manager). The Manager is authorised in terms of the Collective Investment Schemes Control Act, No. 45 of 2002 (CISCA) to administer Collective Investment Schemes (CIS) in Securities. Liberty is a full member of the Association for Savings and Investments of South Africa (ASISA). The Manager is a member of the Liberty Group of Companies. The manager has a right to close a portfolio to new investors in order to manage the portfolio more efficiently in accordance with its mandate. The Manager does not provide any guarantee either with respect to the capital or the return of a CIS portfolio. A schedule of fees and charges and maximum commissions is available on request from the Manager.

The trustee of the Scheme is Absa Bank Limited.

The investments of this portfolio are managed, on behalf of the Manager, by 1INVEST Fund Managers (Pty) Ltd, an authorised financial services provider (FSP), FSP No. 49955, under the Financial Advisory and Intermediary Services Act (FAIS), Act No. 37 of 2002.

Prices are calculated and published on each working day, these prices are available on the Manager's website (www.stanlib.com) and in South African printed news media. This portfolio is valued at 17h00. Forward pricing is used.

This portfolio is an Exchange Traded Fund registered as a CIS (CIS-ETF), it is listed on an exchange and may therefore incur additional costs. Participatory interests in a CIS-ETF cannot be purchased directly from the Manager. A CIS-ETF is subject to exchange listing requirements and settlement cycles for equities and all trading in a CIS-ETF is through an exchange. It may take a few days longer to receive the proceeds of a sale of a CIS-ETF than would be the case for a CIS.

This portfolio is a third party named, incubator portfolio. The Manager retains full legal responsibility for this portfolio. A third party named, incubator portfolio is a portfolio bearing the name of the financial services provider (FSP), who intends to apply to the Registrar to be approved as a manager within three years after the Registrar has approved the portfolio, and where the FSP, under an agreement with the Manager, undertakes financial services of a discretionary nature, as contemplated in the Financial Advisory and Intermediary Services Act, Act No. 37 of 2002 (FAIS), in relation to the assets of the portfolio. 1INVEST Fund Managers (Pty) Ltd, an authorised FSP, FSP No. 49955, FAIS, is the third party manager of this portfolio.

The FSP is a related party to the Manager, the FSP may earn additional fees other than those charged by the Manager. It is the responsibility of the FSP to disclose additional fees to the investor. This document is not advice, as defined under FAIS. Please be advised that there may be representatives acting under supervision.

All performance returns and ranking figures quoted are shown in ZAR and are based on data sourced from Morningstar or Statpro and are as at 31 March 2022.

Annualised return figures are the compound annualised growth rate (CAGR) calculated from the cumulative return for the period being measured. These annualised returns provide an indication of the annual return achieved over the period had an investment been held for the entire period. Actual annual figures are available on request from the Manager.

Portfolio performance figures are calculated for the relevant class of the portfolio, for a lump sum investment, on a NAV-NAV basis, with income reinvested on the ex-dividend date. Individual investor performance may differ due to initial fees, actual investment date, date of reinvestment of income and dividend withholding tax. Portfolio performance accounts for all costs that contribute to the calculation of the cost ratios quoted, all returns quoted are after these costs have been accounted for.

Statistics - Positive Months: the number of individual 1 month periods during the specified time period where the return was not negative; Max Gain: the maximum gain in a trough-to-peak incline before a new trough is attained, quoted as the percentage between the trough and the peak. It is an indicator of upside risk over a specified time period (quoted for all periods of 1 year or longer); Max Drawdown: the maximum loss in a peak-to-trough decline before a new peak is attained, quoted as the percentage between the peak and the trough. It is an indicator of downside risk over a specified time period (quoted for periods of 1 year or longer, where no value is shown no loss was experienced); Highest and Lowest: the highest and the lowest 1 year return (%) that occurred during the specified time period (quoted for all relevant classes launched 1 year or more prior to current month end date).
