

Newfunds Reitway Global Property ETF

Minimum Disclosure Document - 30 June 2021

Portfolio objectives

The primary objective of the ETF is to track and replicate a rule driven, market liquidity-based index, which aims to outperform traditional market cap weighted comparatives. The ETF is designed to give investors rand-denominated exposure to a Portfolio of global listed property stocks selected from the America, Asia Pacific and EMEA regions. Stocks are selected based on pure property fundamentals, price momentum and trading volumes measured in USD over a twelve-month trading period.

The Index is created and maintained by Global Property Research (GPR), a registered Benchmark Administrator under the European Benchmarks Regulation (BMR) based in Amsterdam, The Netherlands.

The construction of the Reitway Global Property Index is based on the premise that the larger and more liquid property stocks tend to follow the General Equity sentiment as opposed to pure property fundamentals.

Annualised return is the weighted average compound growth rate over the period measured. Performance is calculated using the NAV of the Portfolio and represents only past performance. An individual's performance may differ to that of the portfolio as a result of initial fees, brokerage, actual investment date, dividend withholding tax and income reinvestment date. The reinvestment of income is assumed to be effected on actual distributed amount net of withholding taxes; and on distribution payment date.

Portfolio details (cont.)

Management Fee	0.69% ¹
Annualised TER	0.69% ²
Annualised Transaction Charges	0.00% ³
Annualised Total Investment Charges	0.69%

Notes

1. Management fee is the fee which the manager charges for managing the portfolio and is inclusive of VAT. Where the TER is lower than the management fee, the Manager has subsidized or waived allowable expenses. Such subsidies and waivers are not guaranteed perpetually and a higher TER may incur in the future.
2. The Total Expense Ratio (TER) is expressed as a percentage of the daily NAV calculated over a rolling 3 year annualised period.
3. The Transaction Cost of the Portfolio is expressed as a percentage of the daily NAV and is calculated over a rolling 3 year annualised period.
4. The Effective Annual Cost (EAC) measure is a combined sum of the TER and Transaction costs.
5. Scrip Lending - The portfolio does not engage in scrip lending at this stage.

Glossary of terms

Annualised Return - The weighted average compound growth rate over the period being measured.

Annualised Risk - A measure of how much the investment return varies from its average over time.

Constituent Security - A stock which is part of a larger portfolio.

Drawdown - A measure of the deterioration of the portfolio from its historical peak (highest level of the fund), measured since the relevant reference point.

Exchange Traded Funds (ETF) - A listed instrument listed on the JSE whereby the investor essentially owns a proportionate share of the underlying investments held by the Portfolio.

Net Distribution - Accrued income and dividends less portfolio expenses, which is distributed to investors.

Portfolio Risk - A measure of the risk inherent in a portfolio incorporating individual stock volatility as well as the covariance structure of stocks in the portfolio.

Scrip Lending - The lending of securities from one party (being the holder of the securities) to another party (the borrower). The borrower provides collateral for the securities borrowed.

Total Expense Ratio (TER) - This is the total costs associated with managing and operating an investment (excluding financial planning). These costs consists primarily of management fees and other operational expenses such as audit and custody fees. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs.
