

NewWave Silver ETN

Minimum Disclosure Document - 31 December 2023

Note objectives

NewWave Exchange Traded Notes (ETNs) constitutes unconditional, unsecured and unsubordinated obligations of ABSA Bank Limited, that is listed on the JSE Limited.

The NewWave Silver ETN is designed to provide investors with cost-effective exposure to the spot price of silver in a listed instrument denominated in South African rand. Each NewWave Silver ETN is equivalent to 1/100th of an ounce of silver bullion (less investor fees).

Silver is a well known precious metal traded in US dollar per fine ounce.

Reasons to purchase

- An ETN will give exposure to Silver in difficult to reach markets.
- Performance directly tracks the reference commodity or price (less investor fees).
- Cost effective way to invest in Silver not previously accessible.
- Easy to trade and several ETNs can be intraday traded.
- Relatively small tracking error due to investor fees payable.

Glossary of terms

Annualised Return - The weighted average compound growth rate over the period being measured.

Annualised Risk - A measure of how much the investment return varies from its average over time.

Drawdown - A measure of the deterioration of the portfolio from its historical peak (highest level of the fund), measured since the relevant reference point.

Exchange Traded Note (ETN) - A listed instrument listed on the JSE whereby the investor essentially owns a proportionate share of the underlying investments held by the Portfolio.

Interest rate spread - An interest payable to or owing to investors for buying and holding the underlying instrument.

Liquidity - The ease of buying and selling a financial instrument for cash.

Market Maker - The market maker attempts to maintain a high degree of liquidity through continuously offering to buy and sell participatory interests at prices around the NAV, thereby ensuring tight buy and sell spreads.

Net Asset Value (NAV) - The NAV is the total assets of the portfolio less the liabilities.

Portfolio Risk - A measure of the risk inherent in a portfolio incorporating individual stock volatility as well as the covariance structure of stocks in the portfolio.

Scrip Lending - The lending of securities from one party (being the holder of the securities) to another party (the borrower). The borrower provides collateral for the securities borrowed.

Total Expense Ratio (TER) - This is the total costs associated with managing and operating an investment (excluding financial planning). These costs consist primarily of management fees and other operational expenses such as audit and custody fees. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs.

Volatility - Measures the dispersion of price returns around the average over a specific period of time.
