March saw a moderation of recent strong equity market performance globally, and SA was no different. Some consolidation, after a very sharp recovery from the recent lows, is always a good thing. Equities outperformed both bonds and cash, and within equities, it was the mid and small caps that presented the best value. SA bonds took their cue from the weaker global bond markets, exacerbated by rising inflation pressures and poor domestic fundamentals. The strength of the rand (it is now back at the same levels as five years ago), took some shine off global investments, although some performed very well in hard currency terms. European equities were relative outperformers amongst the developed markets, despite the US and UK leading the vaccine rollout. Fiscal stimulus in the US remains at historically high levels, which is fuelling both asset prices and inflation, but with the expectation that it will spill over into the real economy. China led the decline in emerging markets, as regulators in the second largest economy in the world, tighten their rules. But the economy continues to lead both Asia and the world out of the Covid pandemic slump, and this should support renewed market growth in the region.

**Comparative Performance Statistics**

(%)	6m	1 yr	3 yrs (p.a.)	5 yrs (p.a.)
<b>Comparative Benchmark Performance</b>				
SA Equities - JSE All Share Index	24.2	54.0	9.7	8.2

Satrix MSCI China ETF (25%)	-4.0	28.1*	31.9*	22.0*
ETFIA Equity Account - Model Portfolio	10.7	48.3	13.0	7.6

\* Prior to inception, the theoretical historic performance is based on the performance of the respective reference indices of the ETFs selected for this ETFIA Account.

\*\* Refer to Note 1 on back page. Please note historic performance may not be replicated in future.

**Please note: This portfolio has been updated for the 2021/2022 tax year. Investments made in previous tax years will remain unchanged unless requested to switch.****Current Portfolio Holdings**

Asset class	Description	Weight (%)
SA Equity	Satrix DIVI ETF	25.8
	NewFunds Equity Momentum ETF	26.0
Global Equity	Satrix MSCI World ESG ETF	25.2
	Satrix MSCI China ETF	22.9

**Historical Performance**

Note: The theoretical historic performance of the Equity Portfolio is based on the selected ETF allocations and reference index performance of the ETFs chosen for this ETFIA

### Tax-free accounts offered under Section 12T of the Income Tax Act

In February 2015, the SA Government announced a new tax dispensation whereby SA individuals of all ages can invest up to R36 000 per annum, and a lifetime limit of R500 000, in a special tax incentive account. There is no form of tax payable on these accounts – no capital gains tax, no dividend withholding tax, no interest tax and no securities transfer tax. This allowance has been enabled through Section 12T of the Income Tax Act, 1962 and the investors are advised to familiarise themselves with the regulations applying thereto.

### Features of the ETF Tax Free Investment Account (ETFIA)

- ❖ Tax-free accounts using only low cost, transparent and liquid ETFs as components.
- ❖ Low Costs – 1% per annum includes VAT, total administration, portfolio management and advisory fees. All transaction costs, incl. the reinvestment of distributions, are also included in this fee.
- ❖ Modular design allows for contributions from R1000 at any time, up to a maximum of R36 000 per tax year.
- ❖ A selection of four portfolios offered, giving differentiated exposures and risk profiles. You can also invest in individual ETFs for the full R36 000 amount.
- ❖ Tax-free accounts fully compliant with Section 12T of the Income Tax Act.
- ❖ Administrator – Computershare (Pty) Ltd.
- ❖ Portfolio Managers and Financial Advisers – etfSA Portfolio Management Company (Pty) Ltd.

### Who should invest in the Equity Portfolio?

An ETFIA is ideal for investors who want a low cost, transparent investment-linked tax-free account. The Equity Portfolio is suitable for an investor with an investment horizon of at least 10 years and beyond – it is designed to provide maximum growth in capital for tax-free investments.

The portfolio is well-suited for risk-tolerant investors. The intention of this portfolio is to provide a higher risk account that will seek to generate capital gains over time, through total exposure to equities by investing in appropriate ETFs. Any income in the account, which is not the chief objective of this higher risk account, is reinvested in the account on a tax-free basis.

The portfolio does not pay out interest or dividends – any distributions received from underlying investments are automatically reinvested into the portfolio to allow for additional compounded growth on a tax-free basis.

### Notes:

1. The performance of the **Model Portfolio** represents the theoretical performance of the selected ETF allocation without the impact of actual investment cash flows or periodic rebalancing. The performance achieved by an individual investor will depend on the timing and size of specific cash flows.
2. Returns as quoted are net of Portfolio Management and Advisory fees, and Administration and Custody fees – that is, after deduction of all expenses as quoted in the Portfolio Management Total Expense Ratio (TER), transaction costs and administration charges.
3. Returns for periods exceeding one year are annualised. All returns are in Rands.
4. All holdings information is based on latest available data. There may be differences in totals due to rounding.
