<i>Source</i> ETF Issuer Fact Sheets. Unit Trust information (March 2012) ASISA website.		
* <i>Excludes performance fees where applicable</i>		
** <i>Expected annualized TERs.</i>		
*** <i>No management fee charged, but interest rate spread of 0,10% to 0,20% charged.</i>		

Notes:

1. Total Expense Ratios (TERs)

Measure the costs of operating the ETF portfolios, including the management fees and costs of the issuing company. All figures are annualised and normally require that the ETF has a 12 month history in order to calculate. TERs are calculated utilising a standard guideline for all unit trusts and ETFs. The TER is included in price of the ETF product and is not paid directly by the investor.

2. Distribution Costs

TERs specifically exclude the costs of purchasing, selling and owning the products and also exclude the commissions paid to intermediaries or financial advisors. In the case of investors utilising the ETF platform, this distribution and annual administration cost is a maximum of 0,8% per annum (but could be less depending on the size of the investment).

3. Annual Fund Management Fees

These are typically charged by the managers of the portfolios and apply for many unit trusts. However, in the case of ETFs, no annual management fees are charged, which leads to a saving of between 1% to 2% per annum in costs when comparing ETFs with an equivalent unit trust.

4. Financial Advisor Commissions

Investors can transact in ETFs on the ETFSA Platform directly, without using intermediaries, such as IFA's or FSP registered brokers. However, if they do use the services of such financial intermediaries, commissions, up to a maximum of 1% per annum, will be payable.
