# Using ETPs in Portfolios

- Investment portfolios/products can be constructed using ETPs, just like unit trusts, individual shares or unlisted investments.

## What are the advantages?

- **Listing on the JSE brings**
  - Transparency
  - Liquidity – compulsory market making
  - Electronic register and depository
  - JSE Guarantee Fund means security of tenure.

# Advantages of ETPs (cont/.)

## ▪ Lower risk

- Risk is measured as standard deviation against the index benchmark – ETPs are the index.
- Active asset managers underperform the index 85% of the time. If you buy index trackers, you eliminate this systemic underperformance.
- Strategic asset allocation strategy can be more accurately implemented.

# Advantages of ETPs (cont/.)

## ▪ Lower costs

- Total expense ratios (TERs) of ETFs are **half** those of index tracking unit trusts and **one-fifth** of normal unit trusts.
- etfSA "all-in costs: include:
  - TERs.
  - JSE trading costs
  - JSE settlement, transfer, custodian and registration fees
  - All administration costs
  - Asset management fees
  - Financial advice fees
  - Consultation fees
