

1invest SWIX 40 ETF

Fund information update at 30 September 2024

What is the fund's objective?

The objective of the 1invest SWIX 40 ETF is to track the FTSE/JSE Capped Shareholder Weighted Top 40 Index as closely as possible.

What does the fund invest in?

The fund invests in the constituents of the FTSE/JSE Capped SWIX Top 40 Index and aims to replicate the Index by holding the same weightings of these constituents. The Index uses the share register to reduce constituent weights by foreign shareholdings, in addition to the adjustments already made for cross-holdings and strategic holdings of the companies in the FTSE/JSE Top 40 Index, and therefore represent South African investors. The fund is rebalanced quarterly and therefore has minimal trading costs. The fund may also hold a small portion in cash instruments and listed derivatives to effect efficient portfolio management.

What possible risks are associated with this fund?

Risks include general market conditions and market volatility, company specific risk, economic and political risk.

Risk rating

Conservative	Moderately conservative	Moderate	Moderately aggressive	Aggressive
--------------	-------------------------	----------	-----------------------	------------

What is the suggested investment period for this fund?

Minimum period

1 Month	6 Months	1 Year	3 Years	5 Years	7 Years
---------	----------	--------	---------	---------	---------

Who should consider investing in this fund?

- Investors who seek exposure to the South African equity market;
- Investors who seek a low cost fund;
- Investors who seek a simple and transparent investment process that invests in liquid, listed securities;
- Investors who seek equity market exposure that blends well with other investment strategies to reduce total costs and diversify risk;
- Investors who are willing to take a longer term view as this fund is aggressively risk profiled and investors should expect some volatility in the shorter term.

Income

Distribution Net income is calculated and accrued daily and is declared and distributed quarterly.

Declaration Quarterly, in accordance with the JSE corporate actions timetable.

General fund information

Manager(s)	Ryan Basdeo and Rademeyer Vermaak
Size (NAV)	R 4.83 billion
Classification	South African - Equity - Large Cap
Regulation 28	Does not apply
Index	FTSE/JSE Capped SWIX Top 40 Index (J430T)
Methodology	Replication
Rebalancing	Quarterly
Securities Lending Ratio	16.11%

Securities lending can increase returns in a low risk manner. Risks associated with such transactions are borrower default risk. This risk is minimised through all securities lending being fully collateralised and only using reputable counterparties. Exposure of the fund to counterparties is continuously monitored. Manufactured (taxable) dividends could arise from such transactions. The Swix 40 ETF engages in securities lending with Rand Merchant Bank and Standard Bank of South Africa.

Class A

Launch	18 October 2010
ISIN number	ZAE000279220
JSE code	ETFSWX

What are the costs to invest in this fund?

Maximum charges including VAT

	Class A
Annual fee	0.288%
Performance fee	N/A

Annual fee - this is a service charge (% based) applicable to each class of a fund, that is levied on the value of your portfolio and includes the fund management fee and administration fee. The fee also includes other charges such as audit, custody and index provider fees that are normally additional permissible deductions. Annual fees are calculated and accrued daily and recovered monthly from the income awaiting distribution in the fund.

This portfolio is an exchange traded fund (ETF). The charges detailed above relate to the portfolio, they do not include the fees for trading on an exchange. Brokerage fees, which are payable when buying or selling an ETF on an exchange, are levied by a broker and may vary depending on the broker used.

Cost ratios (annual) including VAT as at 30 June 2024

	Class A
Based on period from:	01/07/2021
Total Expense	0.29%
Transaction Costs	0.05%
Total Investment Charge	0.34%
1 Year Total Expense	0.29%

Total Expense (TER): This ratio shows the charges, levies and fees relating to the management of the portfolio and is expressed as a percentage of the average net asset value of the portfolio, calculated over the period shown and annualised to the most recently completed quarter. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER should not be regarded as an indication of future TERs.

Transaction Costs (TC): This ratio shows the percentage of the value of the fund incurred as costs relating to the buying and selling of the fund's underlying assets. TC are a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, investment decisions of the investment manager and the TER.

Total Investment Charges (TIC): This ratio is simply the sum of the TER and TC, showing the percentage of the value of the fund incurred as costs relating to the investment of the fund. It should be noted that performance figures account for all costs included in the TIC ratio, so you should not deduct the TIC from performance figures, the performance is already net of the TIC.

Commentary

Fund review

The fund performed in line with the index over Q3 2024. The last quarterly index review saw the deletion of Anglo American Platinum and the addition of Pepkor Holdings Ltd. The fund has been repositioned for this change and performed in line with its benchmark over the quarter. The fund benefited from its exposure to Mr Price Group Ltd, Pepkor Holdings Ltd and Discovery Ltd, which were the top three performers, with Mr Price Group Ltd returning 31.2% over the quarter. However, its exposure to Aspen Pharmacare Holdings Ltd, Sasol Ltd and Northam Platinum Holdings Ltd detracted from performance over the quarter, as these were the three worst performers in the fund. Aspen Pharmacare Holdings Ltd returned -16.4% over the quarter.

Market overview

We saw the much anticipated first cut in interest rates in the US in September 2024, a 50bp cut. The bond market response was mixed as commentators scrambled to interpret what a 50bp cut as opposed to 25bp cut said about the state of the US economy, but the S&P 500 Index was up 5.5% over the quarter. Labour market statistics remained mixed, and the US consumer appeared to be holding up, and corporate earnings trends remained largely positive. The announcement of monetary stimulus in China provided a strong tailwind for Chinese equity markets in the quarter, with virtually all of the 19.3% gains in the Hang Seng Index arising from mid-September, post the stimulus announcement. The MSCI World Index rose by +6.0% whilst MSCI EM increased 7.8%.

Locally, the formation of the GNU was a key positive event for markets and the Chinese stimulus provided a boost for resource companies in September. There was no load-shedding over the quarter. Water delivery however remains an issue in certain provinces and municipalities and may be an obstacle to corporate investment in certain areas. Over the quarter, the GNU and interest rate related positive sentiment pushed the SA 10-year bond yield from 12.2% to 10.0% and the ZAR was 5% stronger against the USD. This underpinned strong equity performance with the JSE All Share Index 8.6% higher and the Top 40 Index up 7.6%.

Looking ahead

Uncertainty remains around the pace of potential interest rates cuts in the US and indeed around the potential for a "hard landing" or "no landing" for the US economy. We continue to view the most probable scenario as one of a series of 25bp cuts in successive FOMC meetings. The US elections could also have a bearing on the outlook with Trump's threat of heavy tariffs on a range of items, e.g. steel, vehicles, etc. fuelling uncertainty around international trade. The announcement of a monetary stimulus in China bolstered the Chinese market and broader EM during September. However, the market is waiting for Chinese authorities to make more concrete proposals on the fiscal side, particularly with regard to the beleaguered real estate sector.

Locally we see sentiment as more positive than earlier in the year with a combination of the GNU, interest rate cuts and the potential consumption effects of the two-pot savings system improving the outlook. Continued uninterrupted electricity delivery will also help with a more positive operating and trading environment in the last quarter of 2024. This bodes well for SA Inc. stocks, but we have not seen significant buying from foreign investors. This could be the next leg up for SA Inc. if SA Inc. can deliver higher growth. To show higher growth, stronger SA GDP will be necessary, and SA will need to manage some of its structural weaknesses in SOE's and municipalities.

The commentary gives the views of the portfolio manager at the time of writing. Any forecasts or commentary included in this document are not guaranteed to occur.

Change in allocation of the fund over the quarter

Asset type	Q3 2024	Q2 2024	Change
Domestic Cash & Mny Mkt	17.17	1.19	15.98
Domestic Equity	82.83	98.81	-15.98

The portfolio adhered to its portfolio objective over the quarter.

Fund classes

All data as at 30 September 2024.

Units - amount of participatory interests (units) in issue in relevant class.

Disclosures

Collective Investment Schemes in Securities (CIS) are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to future performance. CIS are traded at ruling prices and can engage in borrowing and scrip lending.

The 1invest SWIX 40 ETF is a portfolio of the STANLIB ETF Collective Investment Scheme (the Scheme).

The manager of the Scheme is STANLIB Collective Investments (RF) (Pty) Limited (the Manager). The Manager is authorised in terms of the Collective Investment Schemes Control Act, No. 45 of 2002 (CISCA) to administer Collective Investment Schemes (CIS) in Securities. Liberty is a full member of the Association for Savings and Investments of South Africa (ASISA). The Manager is a member of the Liberty Group of Companies. The manager has a right to close a portfolio to new investors in order to manage the portfolio more efficiently in accordance with its mandate. The Manager does not provide any guarantee either with respect to the capital or the return of a CIS portfolio. A schedule of fees and charges and maximum commissions is available on request from the Manager.

The trustee of the Scheme is Absa Bank Limited.

The investments of this portfolio are managed, on behalf of the Manager, by 1INVEST Fund Managers (Pty) Ltd, an authorised financial services provider (FSP), FSP No. 49955, under the Financial Advisory and Intermediary Services Act (FAIS), Act No. 37 of 2002.

Prices are calculated and published on each working day, these prices are available on the Manager's website (www.stanlib.com) and in South African printed news media. This portfolio is valued at 17h00. Forward pricing is used.

This portfolio is an Exchange Traded Fund registered as a CIS (CIS-ETF), it is listed on an exchange and may therefore incur additional costs. Participatory interests in a CIS-ETF cannot be purchased directly from the Manager. A CIS-ETF is subject to exchange listing requirements and settlement cycles for equities and all trading in a CIS-ETF is through an exchange. It may take a few days longer to receive the proceeds of a sale of a CIS-ETF than would be the case for a CIS.

This portfolio is a third party named, incubator portfolio. The Manager retains full legal responsibility for this portfolio. A third party named, incubator portfolio is a portfolio bearing the name of the financial services provider (FSP), who intends to apply to the Registrar to be approved as a manager within three years after the Registrar has approved the portfolio, and where the FSP, under an agreement with the Manager, undertakes financial services of a discretionary nature, as contemplated in the Financial Advisory and Intermediary Services Act, Act No. 37 of 2002 (FAIS), in relation to the assets of the portfolio. 1INVEST Fund Managers (Pty) Ltd, an authorised FSP, FSP No. 49955, FAIS, is the third party manager of this portfolio.

The FSP is a related party to the Manager, the FSP may earn additional fees other than those charged by the Manager. It is the responsibility of the FSP to disclose additional fees to the investor. This document is not advice, as defined under FAIS. Please be advised that there may be representatives acting under supervision.

All performance returns and ranking figures quoted are shown in ZAR and are based on data sourced from Morningstar or Statpro and are as at 30 September 2024.

Annualised return figures are the compound annualised growth rate (CAGR) calculated from the cumulative return for the period being measured. These annualised returns provide an indication of the annual return achieved over the period had an investment been held for the entire period. Actual annual figures are available on request from the Manager.

Portfolio performance figures are calculated for the relevant class of the portfolio, for a lump sum investment, on a NAV-NAV basis, with income reinvested on the ex-dividend date. Individual investor performance may differ due to initial fees, actual investment date, date of reinvestment of income and dividend withholding tax. Portfolio performance accounts for all costs that contribute to the calculation of the cost ratios quoted, all returns quoted are after these costs have been accounted for.

Statistics - Positive Months: the number of individual 1 month periods during the specified time period where the return was not negative; Max Gain: the maximum gain in a trough-to-peak incline before a new trough is attained, quoted as the percentage between the trough and the peak. It is an indicator of upside risk over a specified time period (quoted for all periods of 1 year or longer); Max Drawdown: the maximum loss in a peak-to-trough decline before a new peak is attained, quoted as the percentage between the peak and the trough. It is an indicator of downside risk over a specified time period (quoted for periods of 1 year or longer, where no value is shown no loss was experienced); Highest and Lowest: the highest and the lowest 1 year return (%) that occurred during the specified time period (quoted for all relevant classes launched 1 year or more prior to current month end date).

Additional information about this product including, but not limited to, brochures, application forms and annual or quarterly reports, can be obtained free of charge, from the Manager and from the Manager's website (www.stanlib.com).
