ETFSA Income Model Portfolio

PORTFOLIO DESCRIPTION

The objective of the ETFSA Income Model Portfolio is to offer a strategic asset allocation into a select range of income-producing SA ETFs listed on the JSE. Sources of income may be interest or dividends. This is a low-cost portfolio, suitable for use in a discretionary or tax-free investment account.

The portfolio does not pay out interest or dividends – any distributions received from underlying investments remain in the portfolio to allow for additional compounded growth.

INVESTOR PROFILE

The Portfolio is suitable for an investor with an investment horizon of 3 to 5 years – investors who wish to preserve the value of their near-term savings and investments. The portfolio is well-suited for investors with a moderate risk tolerance.
