Factsheet - November 2024

ETFSA LA Wealth Maximiser Portfolio

PORTFOLIO DESCRIPTION

The ETFSA LA Wealth Maximiser Portfolio aims to preserve the purchasing power of assets over time be achieving targeted returns of 10% in excess of the level of inflation (as measured by the Consumer Price Index, or CPI) over rolling seven year periods, while reducing the volatility associated with market-linked investments. The Portfolio is constructed through strategic allocations into a range of exchange traded products, exposed to different asset classes, which optimises the cost efficiency and transparency of the Portfolio.

INVESTOR PROFILE

The Portfolio is ideal for investors who want a low cost, transparent investment-linked living annuity. The portfolio is suitable for investors with a very long investment horizon, who want to maximise the potential capital growth of their retirement savings through a very high targeted real return. The Portfolio is only suitable for investors with both a very high tolerance for risk, and sufficient capital to withstand significant potential drawdowns in the near term.
