

# Monthly Performance Survey

South African Exchange Traded Product (ETP) &  
Index Tracking Unit Trust

**September 2024**

**Mike Brown | Managing Director**

The September 2024 Monthly Performance Survey of Exchange Traded Products and index tracking unit trusts reveals a strong comeback for **SA listed property ETFs and unit trusts**.

With returns of close to or over 50% for the past year, products that track indices of JSE listed property shares have illustrated that the recovery of this sector, following the COVID 19 setbacks in 2020. This outperformance by property trackers is also reflected in the top performing products for the 6 and 3 month period.

With the prospects of lower interest rates in future, plus some expectations of future economic growth acceleration, the listed property sector could still show further growth. The JSE Property Index is still some 50% off its previous all time highs.

The strong performance of the **Satrix FINI ETF** over the past year, also signals the recovery in lending as local economic activity picks up. Lower interest rates could continue to promote outperformance by the financial sector going forward.

Elsewhere, the dominance of foreign reference ETFs, particularly those invested in high-tech sectors, is apparent for periods of 3 years or longer. However, the South African equity markets are now outperforming global markets for shorter term periods and this feature could continue.

September 2024 was marked by the listing of 8 new Actively Managed ETFs, with a further 3 new Actively Managed Certificates (AMCs), coming to the market. This brings the total JSE listed Exchange Traded Products to 237, with 68, or 29%, of these products being in the actively managed category. The total market capitalisation of all JSE listed ETPs has grown from R165,4 billion at the end of 2023, to R204,9 billion at the end of September 2024, an increase of 24%.
